EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with George Pappas on 7/10/2007.

The application has been amended as follows:

In The Claims

In claim 1, insert - - designed as a lifting beam - - after 'device' and before 'common' in line 8.

Cancel claim 2.

The following is an examiner's statement of reasons for allowance:
independent claim 1 differs from the known prior art in that it has a second lifting device designed as a lifting beam common to all the warp threads, in order to move the warp threads out of the first shedding position into a switching position active for the first lifting device and in order to move non-selected warp threads jointly into the first shedding position as a result of the pre-tensioning of the warp threads.

The present invention may thus be seen as advantageous in simplifying the design of the shedding device, but while maintaining a high working speed, in particular,

by the use of a second common lifting beam, is neither known from the existing prior art nor suggested by this prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
